

REQUEST FOR PROPOSAL Amendment #2 November 13, 2023

RFP: Vedder River Campground WIFI

RFP NUMBER: RFP-23008

DATE ISSUED: Wednesday October 25, 2023

CLOSING DATE: Wednesday November 15, 2023 1 PM PST

1. Is there existing fibre optics connection to the #1 Washroom facility?

Yes, above ground but underground service is coming as the phase B portion includes the installation of under ground conduit to feed the bathroom and overhead existing fibre is being removed. The fibre for the new conduit is to be supplied and installed by the proponent.

2. Can we get a picture of the equipment and the housing/rack in #1?

This is in the process of being replaced as a part of this winter's infrastructure upgrade.

3. Are we expected to use capacity via the existing fiber optic cable at Washrooms #2 and #1 (if confirmed available) or running new single mode fibre?

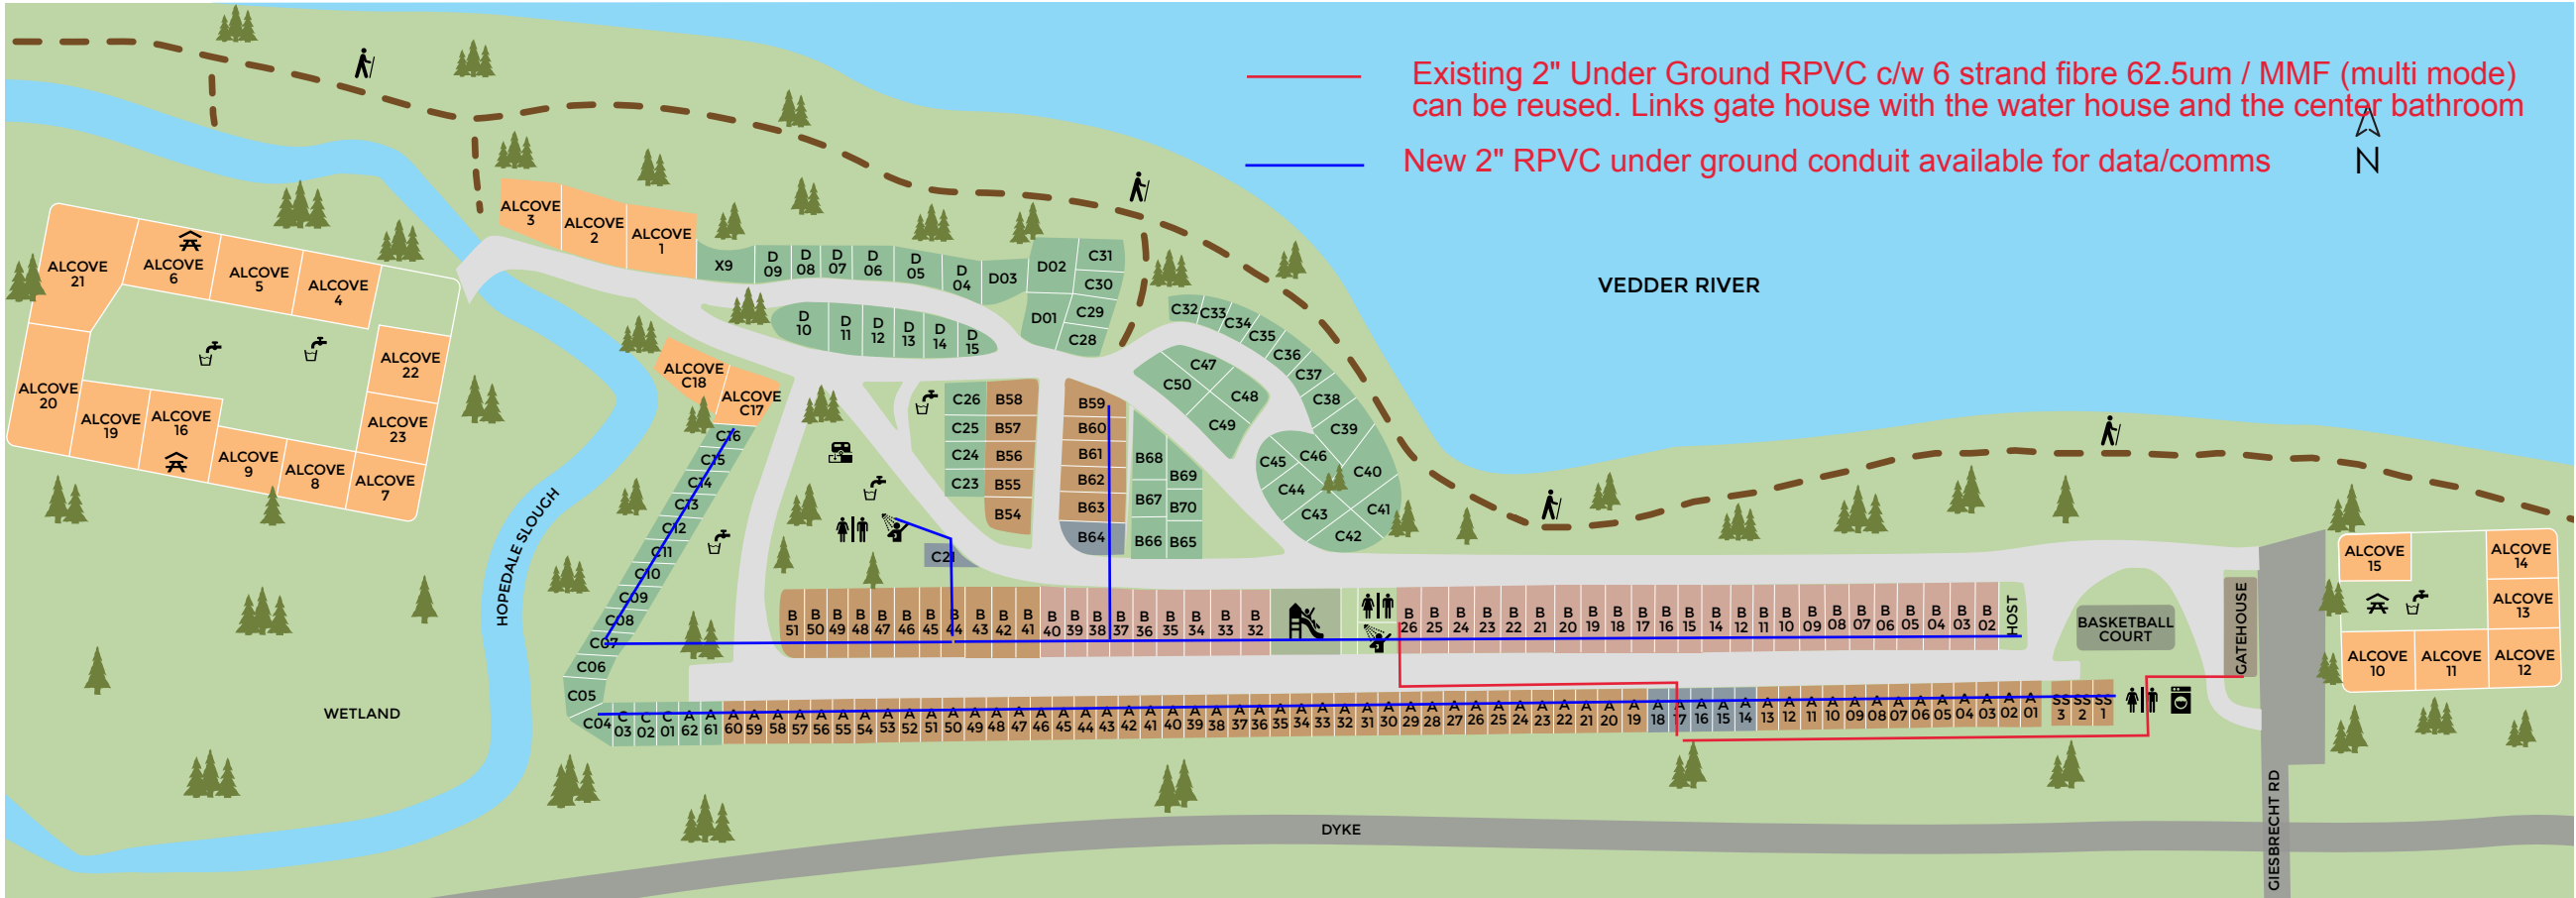

The existing fibre is 6 strand 62.5um (micron) MMF (multi mode fibre) between the water house and the centre bathroom. The use of the existing fibre cables is acceptable but the proponent is responsible for verification of the condition and reliability of the existing fibre cabling.

4. Updated map for data conduit system

Attached

5. E.3 Addendum

This is the final addenda. Wednesday November 15, 2023 1 PM PST is the deadline for RFP submissions.
